

# Make a big deal of it

## Zendesk Sell (formerly Base) is sales force automation software to enhance productivity, processes, and pipeline visibility for sales teams

Legacy sales management tools are often clunky and difficult to use, but Zendesk Sell is simple and designed to keep reps selling. Sell eliminates the friction from deal updates so reps and management are always able to access, analyze, and collaborate on relevant deal data.

### Just a few clicks does the trick

Make calls, send emails, schedule meetings, and view deal history all from one place—without logging everything by hand. Remove the burden of administrative tasks and let your sales team focus on selling.

### Make smarter sales decisions

Everything related to sales is tracked in one system, capturing valuable data that's analyzed in over 30+ reports. Heightened visibility drives informed decision making so teams can make strategic adjustments and boost performance.

### Get everyone on the same page

Call attention to coworkers when logging notes, calls, and visits inside Sell, with features like Collaborators and @Mentions. Adopting a collaborative workflow with your sales team is made easy.

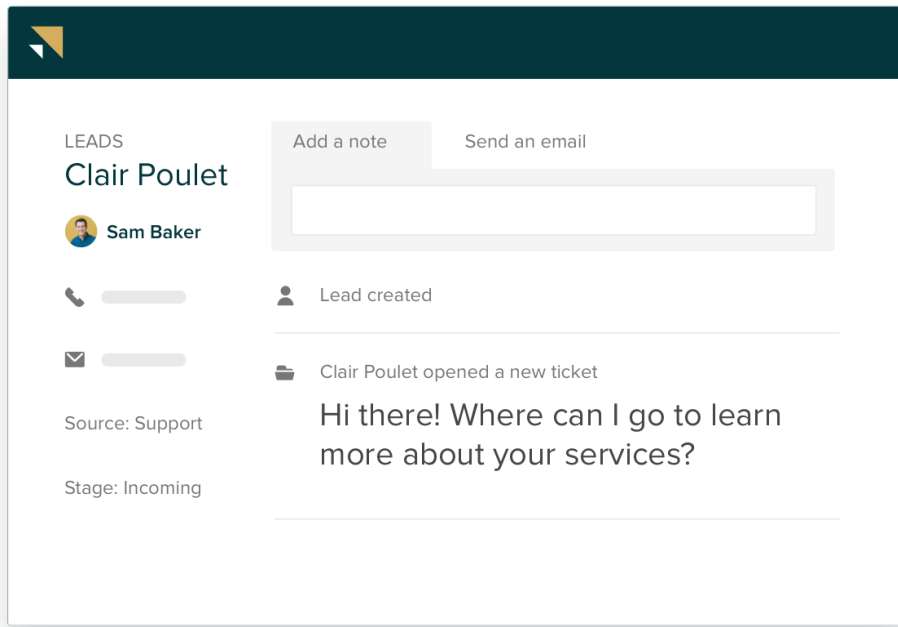

**"We've built our business around a customer experience powered by Zendesk Support and now Zendesk Sell. Our sales and support teams have a comprehensive view of the customer relationship enabling us to deliver a flawless experience across the customer journey."**

David Birchmier - Vice President at Simpleray

## Deepest integration to Zendesk Support

Create a full view of your prospects and customers by connecting your Zendesk Sell and Support accounts. From within Sell, see who has open tickets with your support team. On the flip side, support agents can pass new leads or notify the sales team, with a single click from live support tickets.

## Access sell anytime, anywhere

The industry-leading Sell mobile app empowers you to stay connected on the go because a major opportunity can come up at any time. Rated #1 in our category with unique features like Visit tracking, Geoverification, and Mobile Reports.

## Ready to go, ready to help

Start managing and tracking sales the same day you try Zendesk Sell. The platform is designed for easy setup and fast adoption. Also, our in-house customer success team is focused on providing sales expertise and software guidance when and where you need it.
